

Jared Stander

jared@jaredstander.com | <http://github.com/jaredstander> | <http://linkd.in/1IXSiPV>

SKILLS

Programming Languages: Ruby, PHP, JavaScript.

Libraries: jQuery.

Databases: SQLite, MySQL, Postgres.

Markup: HTML, CSS, ERB, YAML.

Operating Systems Used for development: Linux, Mac OS X, Windows.

Tools: Sublime Text, SSH, FTP, Heroku, Trello, Eclipse.

Frameworks: Angular, Rails, Sinatra.

Version Control: Beanstalk, Git.

Other Skills: ActiveRecord, Rspec, AJAX, public API usage.

EDUCATION

Associates Degree in Web Development from Middlesex Community College

Bachelor's Degree in Political Science from University of Massachusetts Boston

EXPERIENCE

Worked for Tech Target as a marketer, including the **crafting of HTML emails** to list subscribers. 2011

- Built emails outlining new white papers and technical resources using **HTML, CSS, and JavaScript**.
- Used **Google Analytics** in order to monitor open rates and click rates in order to tailor content to our subscribers.

Left Boston to attend **DevBootCamp** (<http://devbootcamp.com>) in San Francisco, CA. 2013

- Heavy emphasis on **pair programming** in order to foster a team atmosphere and learn to **solve complex problems as a team**.
- Worked through daily challenges involving **algorithms in Ruby, command line arguments**, terminal output manipulation, and reading / writing external files.
- Built projects in **Sinatra** to explore **RESTful web services**, implementing public **APIs**, and using **ActiveRecord** to tie models to database records.
- Put previous work together to create full web applications in the **Rails** framework.
- Worked with the **full stack**, including **configuring databases on the OS** to run with locally hosted applications and **hiding secret keys** for API access in **gitignore** files.
- Introduced to testing in Rails, using **Rspec** and
- Experience keeping values in the database predictable using **ActiveRecord validations** on the back-end and **JavaScript validations** on the front-end.

Worked for SharkNinja as a **Web Operations Specialist** 2014

- **Built microsites** for consumer products to match offer configurations used in infomercial advertisements.
- **Installed WAMP** stack (Windows Apache, MySQL, and PHP) in order to build and test microsites on the localhost environment.
- Made **custom configurations to Apache** to serve sites from localhost across a variety of **virtual domains** using version-controlled repositories as root directories for each domain.
- **Committed code changes** to microsites as well as new microsites to remote repositories **using Beanstalk**.
- **Brainstormed and built custom projects** in order to help with everyday workflow.

Worked for Deftr as a **Freelance JavaScript Developer** 2016

- **Build custom graph** visualization using **D3** library.
- **Populate graph data dynamically** with **JSON** data passed from **AJAX** calls.
